*Leveluk K8*

It's no secret that water is the most important resource on the planet, critical for sustaining all forms of life. The quality of the water we drink, plays a major role in our health and dramatically affects our body function.

Through the process of electrolysis, Enagic® ionisers made in Japan, turn your ordinary, often chemically altered tap water into Kangen Water® (pure, filtered, negatively charged, alkaline mineral water, rich in molecular hydrogen). This has been proven to be a potent antioxidant and provides astonishing therapeutic benefits for the human body.

However drinking the water is only the beginning, with many other uses for the various pH waters Enagic® ionisers create.

Enagic® are the world leaders in water ionisation, achieving multiple ISO certification standards and their machines are registered medical devices in Japan. Enagic® have been original equipment manufacturers for over 44 years, with offices in 22 countries all over the world.

Make a request for an eye opening, in home demonstration on how Kangen Water® could quite literally change your life.

For centuries, human beings have been in regular contact with the earth. More recently, we have become increasingly disconnected from the natural healing power of the negatively charged ground beneath our feet.

We insulate ourselves from the ground in many ways every day, by wearing rubber soled shoes, we drive cars with rubber tyres and we live and work in buildings that keep us even further from contact with the earth. Even when we finally kick off our shoes at the end of our day, we commonly walk on wood or carpet with rubber underlay and sleep in beds that keep us off the ground, while our bodies are supposed to be in recovery mode.

When you add to this, exposure to damaging electromagnetic fields from cell phones and Wi-Fi, along with many other forms of electrical bombardment in our day, it's no wonder poor health and illness seems to be on the rise.

One of the leading causes of disease in the human body is inflammation. When your skin or bare feet are in contact with the earth, damaging, positively charged free radicals are neutralised and the healing process can begin.

Ask for a demonstration on how grounding affects your body and the products to reconnect you with the earth.
